This is a timed test. I had 5 minutes to complete it and show that I can solve or have learned these equations. If I didn't complete it, the rest is homework.

I should be having enough repetition that I can begin to "see" a picture of these in my mind to be able to solve without using fingers or materials.

☐ fantastic ☐ okay ☐ need more practice please

1+3=	1+1=
2+3=	0+5=
4+1=	3−2=
1+3=	0−0=

bonus!

+2=5

+2=10
