

Parent Fractions Cheat

Make Equivalent Fractions

$$\frac{3}{5} \quad \frac{5}{7}$$

Buterfly Method- Cross Multiply!

$$\frac{13}{15} \quad \frac{9}{10}$$

Estimate! 0, 1/2 or 1?

Convert to a decimal by dividing!

$$\frac{4}{5} \quad \frac{9}{10}$$

+ Adding or - Subtracting

1. Find common denominators.
2. Add or subtract!
3. Simplify

Regrouping with mixed numbers is sometimes needed to subtract!

$$5 \frac{1}{4} \\ - 4 \frac{5}{4}$$

Multiplying X

1. Get both terms in fraction form. (You may need to convert mixed numbers!)
2. CANCEL if you can.
3. Multiply numerator by numerator.
4. Multiply denominator by denominator.
5. Simplify!

Dividing!

1. Get both terms in fraction form. (You may need to convert mixed numbers!)
2. **KEEP** the first fraction.
3. **Flip** the second fraction.
4. **Change** to multiplication.
5. Multiply Simplify!
