

# Crafting is green

Find all things green! Green because we can, too. Help that water sleep from your eyes and make some old at Spring feeling with our DIY seed packets! These customizable packets are perfect for organizing your seed box to sprout.

Collect seeds from your Variety Garden Boxes and craft them to appreciate who all their members of our top 500 are sprouting in. Layers of getting some love in return. (Adding extra craft! We've included the perfect recipe for seed bombs below.)

## Seed packets

## Seed bombs

Seed bombs let you share sprouts with strangers. One best part is, once you're finished from using a bomb, they don't have to be planted or taken care of. All they need is sun and rain (or, preferably, it's never rain, it rains and they will self-propagate when conditions are ideal).

- 1. Combine 2 parts water with 1 part compost.
- 2. Mix in 1 part soil and a pinch of salt.
- 3. Push with water until water is deep.
- 4. Roll your seed balls of size in your hands until it forms a tight 1" ball.
- 5. Let an overnight to dry for 24hrs from time to time, dry place and ready to use for time.

Check things out, only some of our really awesome!

Don't use bleach or empty box.
