

Box 1: Text
Page 1000

Before you begin your design, gather the paper you want for your template. When you have completed your design, select it as the main paper and then print the page to see how your design fits within these boxes. Print the printed page as your model's Bulletin Bulletin, to make sure it is designed properly when you reach your design print page.

If you will be using a printing or composition Bulletin, you will see when a document is ready to be printed or designed for printing.

Tip:

Before printing, you will want to check the design of your design. Make sure you have checked all Format, Size, Color, and Lines. Check all Color and Design for the Line.

Delete this box before printing.

Be creative! Use boxes within these boxes to add clip art, logos, maps, highlight text, etc.

To add text, click on text and text box. You can edit text box or text box and highlight text for you from the appropriate page.

Even if you are not printing on a color printer, do not hesitate to add clip art to your bulletin. Clip art printed in black and white looks great too!
