

1/2" seam line practice. Sew along dotted lines, then try to sew straight lines without dashed lined guide.

1/4" seam line practice. Sew along the dotted line. Slow down when you get to the corners. When you reach the corner, make sure your needle is still lowered, lift the presser foot, turn the paper, lower the presser foot, and repeat.

**Practice Stitching**  
 No need to thread your sewing machine.  
 This practice sheet will help you sew straight & curved lines, gauge the distance of 1/4" & 1/2" seam lines, lifting the presser foot on turns and determine the speed in which you should sew in certain areas.

1/4" seam line curves. Turn the paper gently as you sew along the curves. You may need to gradually go slower as you near the center and the curves get tighter.

For fun practice! :)
