

Pirate Skull Half Mask

The size of the mask can be adjusted by reducing or enlarging the stencil on a copy machine before transferring to material. Pin the pattern to a sheet of stiff white felt or craft foam and cut along the outside and eyes. Cut out the hat from black felt and glue to white material. A hot glue gun works best when attaching felt. Cut out the round button in gold or yellow felt and glue to the hat. Cut holes for string attachment by using a hole punch tool and attach string or ribbons.
