Flyer Design Tips

- Align each element by using a grid
- Avoid using pictures not matched to the article
- Avoid using too many different typeface styles
- Use a harmonizing color palette

Inserting a Photo

To replace the photos in these templates, select the photo-container by clicking on the photo. Then, on the Insert menu, click Picture, select a photo from your computer, and choose Replace.

Writing a Title

A good title will quickly and distinctively convey what your flyer is about and for whom it is intended. Remember to keep the name easy to pronounce and to avoid double entendres that may have a negative or pejorative meaning.
