

ST. PATRICK'S DAY MATH JOURNAL PROMPTS

Jack O'Malley used 12 potatoes in his famous Irish recipe. He got 6 of the potatoes from his neighbor and had to buy the rest from the store. How many potatoes did he buy from the store?

There was a pot of gold at both ends of the rainbow! one pot had 8 pieces of gold in it. The other pot had 6 pieces of gold in it. How many pieces were there altogether?

Lucky the Leprechaun found 7 shamrocks in his backyard and 4 in the garden. How many shamrocks were there altogether?

Brady O'Shea saw 10 leprechauns. Before he could catch them, they all ran away! How many leprechauns did Brady catch?

There were 9 children sitting on a bench. 6 of the children were lassies. How many were laddies?

Lucky the Leprechaun had 14 pieces of gold. He used 3 pieces to buy a ride on the Rainbow Rollercoaster. How many pieces does he have left?

In Molly McBrady's class there are 15 students. On St. Patrick's day, all but 4 students wore green. How many students are NOT getting pinched?
