Material Print List

There are links under Job Name that will jump you to each section.

How many of each are you installing?

Give attention to things that turn red. It may not mean something is wrong; just incomplete. If you select to supply fixtures and you select to install a fixture, the "Fixtures" section will be red until you select that fixture.

Remember always press the Save/Close button to save and close program when you are finished.

The first section is for rough plumbing.

Then a section for finish plumbing tasks. Some in the finish section will be answered automatically from the rough section.

Followed by a section for selecting fixtures.

| Rough Plumbing | | | |
|---|------|----------|--|
| Are you using Copper or Pex? 1 if Copper, 2 if Pex, and Blank if not providing rough materials. | | | |
