

Dear Maura Fern,

Merry Christmas 2011 from the North Pole! I've heard that you've recently entered this world with some measure of excitement. You are so young and impressionable; yet I sense you will one day possess a vivacious personality. Please take it easy on your mother and father; we want them to grow old naturally.

We've been getting ready for the Big Day! Please know we plan to make a special visit to the Children's Hospital of Philadelphia and NICU's around the world in your honor. Ooh, I won't forget any of your preemie buddies either! Emilie, Owen, and Tristan are definitely on my list this year.

The reindeer are practicing their takeoff and landing formations; most notably, Rudolph's nose is shining brighter than ever this time of year! The elves are busy at building and wrapping presents. Though, I understand that you would really appreciate some teeth. I'll put a call into the Tooth Fairy to see if we can work in some holiday magic.

I have my way of knowing whether you've been naughty or nice, so you had better be nice for goodness sake!

Sincerely,

Santa Claus
Santa Claus
