Peel

Print and Cut Instructions:

1. Create a new file with "show registration marks" checked in the registration marks options panel.
2. Place your "print & cut" image on your screen in the Silhouette Studio® software.
3. Once you have your image sized and placed on the screen to your liking, print your job to your regular home printer. Be sure to feed the sticker paper into the printer so that it will print on the transparent side.
4. Place your printed sticker paper on the cutting mat and feed it into your Silhouette electronic cutting tool.
5. In the media settings, select "Silhouette printable sticker paper" and adjust the blade as indicated.
6. Click "cut" and the Silhouette optic scanner will read the registration marks and start cutting.
7. When the Silhouette is finished, remove the sticker paper and gently peel out the shape.
