

3D Treasure Day

Dear Parents/Guardians,

We have begun learning about 3-dimensional shapes. Over the weekend, please work with your child in reviewing these shapes. Have your child look for objects in and around your house that are 3-dimensional. Some examples are listed below.

We will be having a 3-Dimensional Treasure Day on _____ in which your child is asked to bring in ONE 3-Dimensional object that has been found around the house. Please ensure that the object is small enough to fit inside your child's backpack, is clearly labeled with marker name and is non-breakable (i.e. no glass).

Examples:

Sphere – ball

Cone – party hat, disposable paper cup

Cube – box, block

Cylinder – toilet paper roll, pop can

Rectangular Prism – tissue box

Thank you for your support and have a wonderful weekend! Happy treasure hunting!

Sincerely,

The Kindergarten Teachers
