Name:

Communicating

Talking to someone is called 'communication'. You can communicate in lots of different ways to another person. You can write a letter or talk on the telephone or you can use a modem and computer.

You can use light signals too. Have you ever flashed a mirror into the sun or signaled with your torch? Some people give signals with light flashes. This is called heliograph.

Circle the different communication methods you could use.

talk	radio	television
telephone	morse code	oven
swimming	signals	writing
heliograph	spaghetti	fax

Design your own communication equipment either by drawing or by using recycled materials.

Show and tell your class what it is and how it works.

Sample only
