

Wolf Half Mask

The size of the mask can be adjusted by reducing or enlarging the stencil on a copy machine before transferring to material. Pin the pattern to a sheet of stiff gray felt or craft foam and cut along the solid lines (outside edge and eyes). Cut out the nose pattern in black felt and two pieces of white felt using the fang pattern. Glue these pieces to the mask where indicated. A hot glue gun works best when attaching felt. Cut holes for string attachment by using a hole punch tool and attach string or ribbons.

For Nose:
Cut 1 from Black Felt
and glue to mask.

For Fangs:
Cut 2 from White Felt
and glue to mask.
