

ELVIS PRESLEY

**Other Applied Sciences**—Biomaterials engineers study materials science and engineering to design, manufacture, and test medical devices, implants, prosthetics, and other products.

**10-077** "The most important thing is to have a good relationship with your customers. I think that's what makes us successful."

Business Effectiveness: Business effectiveness depends on how well a business manages its resources, maintaining sufficient capital and liquidity to meet its obligations. This includes financial resources, fixed assets and other non-financial resources. Business effectiveness is concerned with efficiency and productivity.

recovery, growth, and capacity expansion notwithstanding. However, the
