

Quiz: Lesson 3

GOOD JOB! YOU'VE PASSED THIS QUIZ WITH A SCORE OF 100%.

Question 1

What consequences of heavy drinking do men and women experience differently? (Select all that apply)

CORRECT

- a) Men tend to suffer more academic problems from heavy drinking
- b) Women are more likely to be impaired if they drink comparable amounts of alcohol
- c) Women are at greater risk for blackouts
- d) Women are at greater risk for unwanted sexual advances, depression, and abusive relationships

Question 2

What percentage of 1st-year students fail to enroll their second year?

CORRECT

- a) 12%
- b) 20%
- c) 33%

Question 3

Select the statement that is true about alcohol tolerance.

CORRECT

- a) The definition of tolerance is that at low concentrations, alcohol acts as a stimulant. As your BAC increases, alcohol acts as a sedative.
- b) A higher tolerance means your body gets rid of alcohol at a faster rate than others.
- c) If you reach a BAC level beyond a normal social drinking range and not feel some of the effects of lower BACs, you have a higher tolerance for alcohol.

Question 4

What consequences of heavy drinking do men and women experience equally? (Select all that apply)

CORRECT

- a) Similar BACs when drinking comparable amounts of alcohol
- b) Similar risks for blackouts
- c) Similar risks for getting into fights
- d) Similar risks for academic problems

Question 5
