

Count on Me by Bruno

It's so easy to get so busy that it's hard to be there for the people you love. But when you're busy, you're not really living. You're just existing. And when you're just existing, you're not really living either.

So when you're busy, you're not really living. You're just existing. And when you're just existing, you're not really living either.

So when you're busy, you're not really living. You're just existing. And when you're just existing, you're not really living either.

So when you're busy, you're not really living. You're just existing. And when you're just existing, you're not really living either.

So when you're busy, you're not really living. You're just existing. And when you're just existing, you're not really living either.

So when you're busy, you're not really living. You're just existing. And when you're just existing, you're not really living either.

So when you're busy, you're not really living. You're just existing. And when you're just existing, you're not really living either.

So when you're busy, you're not really living. You're just existing. And when you're just existing, you're not really living either.

So when you're busy, you're not really living. You're just existing. And when you're just existing, you're not really living either.

So when you're busy, you're not really living. You're just existing. And when you're just existing, you're not really living either.

So when you're busy, you're not really living. You're just existing. And when you're just existing, you're not really living either.

So when you're busy, you're not really living. You're just existing. And when you're just existing, you're not really living either.

So when you're busy, you're not really living. You're just existing. And when you're just existing, you're not really living either.

So when you're busy, you're not really living. You're just existing. And when you're just existing, you're not really living either.

So when you're busy, you're not really living. You're just existing. And when you're just existing, you're not really living either.
