

# cozy cottage box

This charming paper house can be used as either a tiny gift box or an ornament for your tree. Photocopy and cut out the house below and fold all the tabs and sides. Use a glue stick to attach the tabs to the sides of the house. To use the house as a gift box, keep the roof panel glue-free. For an ornament, poke a small hole in the center of the roofline. Thread a knotted loop of ribbon through the hole so the knot is inside. Glue the roof closed.
