Babies are beautiful and bring joy to a family. This handy schedule will help the new parents keep the baby's busy day Buttoned Up. Record how much the baby is eating, how often they need changing and last time they had a nap or bath. We've even included space to track those special things that happened in a day, medicines used or given to the baby, and things to remember—like to tell Daddy something, or to buy something the baby needs, or doctor appointments!
