

The Amazon Rainforest is	can help sick people.
However, a big problem is	Indians lived in the Amazon Rainforest.
Special plants in the Amazon Rainforest	very important for our planet.
The plants are called	less than 200 000.
Five hundred years ago, more than 20 million	important for the world that we learn what they know.
Now there are	that people cut down the trees and want to make money quickly.
The Indian medicinal men	the world's new gold because they help against many diseases.
But now they are very old and it's	how we can help the Amazon Rainforest.
We should think about	this wonderful part of the earth.
It is terrible when people destroy	knows let about these special plants.
