

Print out the folding instructions and the pictures. Pair them back to back so that the picture is on one side and the instructions on the other. Hold them up to a light so you can precisely align them and staple in a couple of places like a book so you can then accurately glue the two together. Then cut to remove the black/pink outline.

Lightly pre-crease along the M(ountain fold) and V(alley fold) lines. M means fold away from you so the M line is closer to you. V is the opposite. Tape the A's together first, then B, etc. (preferably applying the tape to the instructions side).

When properly folded and taped, the fold instructions should be on the outside and the picture should be on the inside of the "cup" shape.

To see the 3D "following you" effect, place a light slightly below the face. Close one eye and walk to either side.
