

# SCAVENGER HUNT

You've just picked up the scavenger hunt sheet and are standing in the main Entrance Hall of the Redpath Museum. On the ceiling hang whale skeletons, on the walls there are bones of underwater animals from long ago ...

So let's begin the hunt! Write down your answers and check them on the last page when you're done!

1. Can you find the biggest bone in the Entrance Hall? What is it?

- A) triceratops horn OR  
B) broken skull bone of a whale  
OR C) humerus (upper arm bone) of a Steller's Sea Cow

2. As you climb the stairs to the second floor, you will see a large slice of a HUGE Douglas Fir tree. Each ring represents a year of growth for the ancient tree.

Can you find the growth ring when Jacques Cartier discovered the island of Montréal?

In what year did he discover the island ? \_\_\_\_\_

3. Now move up the stairs to the shells and minerals displays. You will see a large meteorite that crashed into the Earth from outer space! Roughly how old is the meteorite? \_\_\_\_\_

4. Looking through the doors into the Dawson Gallery is the museum's *Albertosaurus* exhibit. Take a closer look at its legs. This poor *Albertosaurus* broke one of its legs while it was still alive. Can you figure out which leg it broke? (Hint: Check the *Albertosaurus* information cards)  
A.) Right leg B.) Left Leg

How can you tell?

5. How many dinosaurs can you find in the diorama titled: *Dinosaurs of Western Canada* that is located behind the *Albertosaurus* skeleton?

a. 3      b. 5      c. 7      d. 6      e. 9

6. Next to the *Albertosaurus*, there is the skull of a *Saber-toothed Cat* or *Smilodon*. When did this animal live? \_\_\_\_\_
