

THE GREAT NUMBER RACE

Roll your wheel to see how far the number you get will go.
Place your finger on the number that is the same as the one you rolled to move.
Keep it here until you roll a different number plate.
Continue rolling your finger along the number line to 100 miles.
You win when you reach 100 miles.

HOW MANY DO YOU SEE?

How many cars can you see in the image? How many people? How many trees? How many buildings? How many things you see that are not cars, people, trees, or buildings?
