

WE ARE

We are the people of the United States of America.
We forget what blessings we have and where we came from.

We can sleep in our own homes without fear of being arrested.
Or tortured as is done by North Korea to their own artists.

We are a melting pot, not in institutions and cultures.
We celebrate our diversity but remain united in freedom.

China created problems for the Olympic Games through visas.
Where we can travel across our entire country without restrictions.

Crossed roads in the Mid-East are littered with land-mines.
We can walk safely from our homes holding our children's hands.

We have tragic history but we fought, learned truth and grew.
We can praise God, speak our mind, protest within our own beliefs.

We still seek reforms in health care, schools, the justice system.
Our vote, participation and courage of belief will help us succeed.

We have been blessed with freedom from the sacrifice of many.
Including those who gave the highest price for us with their lives.

We are the people of North America across fifty united states.
Hearts that beat in tempo with love, hope, faith and freedom.
Happy Birthday America and Happy 4th of July, we are USA!
