4. _____
5. _____
6. _____

Summer

7. _____
8. _____
9. _____

Fall

10. _____
11. _____
12. December

Frankie Says:

Have your child look at a calendar with you and circle the dates of important days such as birthdays, holidays, appointments, and school happenings. Then have your child follow your instructions to find certain months. Here are some ideas to get you started: "Find the month when you will have your birthday. Point to the month when school starts. Point to the month when you have your dental checkup. Find the month when spring arrives."
